

Metso Thomas Dredge Pump

The Metso Thomas 200 mm (8 inch) dredge pump is a high-performance pump designed for dredging operations in various environments such as lakes, rivers, and coastal areas. It is capable of pumping slurries, mud, and sand with a maximum particle size of up to 76 mm (3 inches) and a flow capacity of up to 375 m³/h (1,650 US gpm).

The pump features a heavy-duty casing and impeller made from wear-resistant high-chrome alloy, which ensures extended pump life and reduced maintenance costs. It also comes with a suction and discharge flange, as well as a shaft seal, all of which are designed to ensure a reliable and efficient operation.

In terms of price, the cost of the Metso Thomas 200 mm dredge pump can vary depending on a number of factors, including its condition, age, and location. If you are interested in purchasing this pump, I recommend contacting us to obtain more detailed information about the price and any other relevant details.
