

## Electric driven suction dredger

{gallery}electric-dredger-10{/gallery}

The electric driven suction dredger that we described is a powerful piece of equipment designed for dredging activities. The dredger has a 10 inch suction and an 8 inch discharge with a dredging depth of 8 meters. It is equipped with a Warman dredge pump and a 132 kW electro engine, which makes it capable of handling a wide range of dredging tasks.

The dredger was manufactured in 2018 and has only been used for 2 months, making it almost new. It comes with a 150 m electric cable and 50 m of pipes included in the package, making it easy to set up and start using immediately. The dimensions of the dredger are 13.5 x 2.4 x 1.5 m, and it weighs 22 tons, making it a substantial and robust machine.

This dredger is suitable for use in a variety of settings, including in ports, harbors, canals, and rivers. It is ideal for removing sediment, gravel, and other materials from the bottom of water bodies. If you are interested in this dredger, you can request more pictures and information from
