

Electric driven suction dredger 300

Electric driven suction dredger

The electric driven suction dredger that's for sale has a suction diameter of 300mm (12 inches) and a discharge diameter of 250mm (10 inches), and is capable of dredging to a depth of 15 meters. It features a powerful Warman dredge pump with a 250 kW electric engine, providing efficient and reliable operation. The dredger was manufactured in 2016 and comes with 200 meters of pipes and an 800-meter electric cable for the transformer mobil (1000 KVA).

The dredger has dimensions of 26 x 6 x 1.6 meters and weighs 45 tons, making it a substantial piece of equipment. It is well-suited for dredging tasks in a variety of environments, including rivers, lakes, and canals. The electric power source makes it an environmentally-friendly option, reducing the carbon footprint associated with traditional diesel-powered dredgers.
