

Experience Unmatched Dredging Performance  
with Our Reliable Used Jet Suction

## Introducing Our Exceptional Jet Suction Dredger: Unlocking New Depths

Introducing our exceptional Jet Suction Dredger, a remarkable vessel built in 2013 and commissioned in 2015. Powered by a reliable Cummins engine, this dredger boasts impressive capabilities to meet your dredging needs.

Equipped with a robust Diesel main pump of 8/10" Warman model, our dredger ensures efficient suction power for optimal performance. The jet system, supported by an external power supply, enhances the dredging process. Experience the convenience of electric rope winches and the main winch, making operations smoother and more efficient.

Our Jet Suction Dredger prioritizes functionality and comfort with its ergonomic cabin design. Enjoy a seamless and comfortable working environment while maximizing productivity. With a pipeline length of 240 meters, complete with floaters, we provide extensive coverage for your dredging projects.

# Experience Unmatched Dredging Performance with Our Reliable Used Jet Suction

~~Dredger!~~  
Unlocking new depths, our dredger allows for material excavation up to an impressive 12 meters. Experience the versatility and precision required for various dredging tasks with our state-of-the-art technology.

Invest in our Jet Suction Dredger and elevate your dredging operations to new heights. Contact us today to learn more and witness the remarkable capabilities of our dredger firsthand.
